Manjeshwar, India

PROFESSIONAL SUMMARY

Software Engineer and Full Stack MERN Developer with hands-on experience building scalable web applications, REST APIs, database-driven systems, and secure authentication workflows. Skilled in developing clean backend logic, optimizing database queries, integrating third-party APIs, and following Clean Architecture and SOLID principles across collaborative development environments.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, SQL, HTML5, CSS3, Python, Java, C, C++
Frameworks & Libraries: React.js, Next.js, Redux, Redux Toolkit, Zustand, Tailwind CSS, Bootstrap, EJS, Framer Motion
Backend & APIs: Node.js, Express.js, REST APIs, JWT, Socket.IO, WebSockets
Authentication & Security: OTP Verification, Role-Based Access Control (RBAC), NextAuth.js
Databases & ORM: MongoDB, Mongoose, PostgreSQL, MySQL, Redis, Prisma
Payments, AI & Cloud: Razorpay, Cloudinary, Google Gemini API, AWS EC2, Vercel, Render
Tools: Git, GitHub, Nginx, Postman, VS Code, Figma
Software Engineering: Clean Architecture, Repository Pattern, Service Layer, SOLID Principles, Dependency Injection, DSA, Database Query Optimization

WORK EXPERIENCE

- Full Stack Development Trainee | Brototype **Oct 2024 – Present**
Industry Training Program *Hybrid, Kozhikode*

- Built responsive UIs and backend logic following Clean Architecture and SOLID principles for scalable application development.
- Designed, integrated, and documented 30+ core REST APIs for secure third-party data handshakes and application workflows.
- Debugged front-end layout issues and server-side errors, improving application stability during development and testing.
- Managed MongoDB schemas and optimized PostgreSQL/MySQL queries using indexing techniques to improve database retrieval performance.
- Maintained API specifications and Git/GitHub workflows across multiple projects, including pull requests and merge conflicts.

Technologies / Skills Used: MongoDB, PostgreSQL, MySQL, REST APIs, Git, GitHub

- Web Development Intern | Zidio Development Pvt. Ltd. **Jun 2026 – Jul 2026**
Web Development Internship *Remote*

- Developed **LOOP**, an AI-powered customer-feedback platform for ingesting, classifying, and analyzing multi-channel feedback.
- Implemented multi-tenant workspaces, RBAC authentication, protected routes, CSV import, feedback management, filtering, and dashboards.
- Integrated Anthropic Claude for feedback classification, theme detection, trend analysis, and RAG-based conversational queries.

Project: LOOP — AI Customer-Feedback Intelligence Platform
Technologies / Skills Used: Next.js 14, TypeScript, PostgreSQL, Prisma, NextAuth, Tailwind CSS, Anthropic Claude API, pgvector, Recharts, Zod, Vercel

- MERN Stack Development Intern | Skillified Mentor **Jun 2026 – Jul 2026**
One-Month Internship *Remote*

- Developed a full-stack **Authentication System** with signup, login, profile management, JWT authentication, refresh tokens, protected routes, and bcrypt password hashing.
- Built a **Blogging Platform** with React, CRUD APIs, blog/comment management, search, pagination, and authentication.

- Integrated React frontends with Node.js/Express APIs and MongoDB for user and application data management.

Projects: Authentication System; Blogging Platform

Technologies / Skills Used: React.js, Node.js, Express.js, MongoDB, JWT, Refresh Tokens, bcrypt, REST APIs

PROJECTS

- QuickMate — Job Service Platform

GitHub: github.com/Moosabilal/Quickmate-frontend | **Live:** quickmate.moosadev.online

- Architected a modular MERN/TypeScript backend using the Repository Pattern, mapping 13 core data models including Booking and Wallet for scalable application development.
- Engineered peer-to-peer WebRTC communication and integrated Razorpay and Cloudinary APIs for real-time communication, media processing, and payments.
- Developed secure JWT authentication and a double-entry ledger Wallet system for earnings, refunds, and subscriptions.
- Integrated Google Gemini API to build a context-aware AI chatbot supporting complex business workflows.

Technologies: MERN, TypeScript, WebRTC, Razorpay, Cloudinary, JWT, Google Gemini API

- Eagleswing — Fashion E-Commerce Platform

GitHub: github.com/Moosabilal/eCommerce | **Live:** eagleswing.moosadev.online

- Architected a Node.js/EJS-based e-commerce storefront with server-side rendering and dynamic product, cart, and order management.
- Integrated secure Razorpay checkout flows and a custom wallet system to support reliable payment processing and transaction management.
- Optimized MongoDB inventory queries using indexing techniques, improving database read performance during application testing.
- Deployed the application on AWS EC2 with Nginx as a reverse proxy, configuring the production environment for real-world usage and testing.

Technologies: Node.js, EJS, Razorpay, MongoDB, AWS EC2, Nginx

Other Projects

- **SpaceVote — Real-Time Polling & Chat App:** Real-time polling and community chat application built with Node.js, Express, Socket.IO, and TypeScript.
- **MERN Admin Dashboard:** Secure dashboard featuring JWT authentication, Redux Toolkit, Tailwind CSS, and CRUD operations.
- **MERN Stack Survey Application:** Full-stack survey platform built with MERN and TypeScript using Clean Architecture and InversifyJS dependency injection.

ACHIEVEMENTS

- Selected as a participating student in **QuizOff 2026: India's Biggest AI Quiz**, organized by CampusCrew and hosted on Unstop, with participation from 5,25,000+ students across 48,500+ institutions.
- Participated in the Scaler Masterclass **"SOLID Principles Every Developer Must Know"** on 6 August 2026 for technical upskilling.

CERTIFICATIONS

- **Scaler Masterclass — SOLID Principles Every Developer Must Know** *6 Aug 2026*
- **QuizOff 2026 — India's Biggest AI Quiz** *19 Jul 2026*

EDUCATION

Shree Devi College (Mangalore University) **Jul 2021 – Jul 2024**
Bachelor of Computer Applications (BCA) **CGPA: 8.5**

Srimath Anantheshwara Temple Higher Secondary School **Jun 2019 – Mar 2021**
Higher Secondary Education **Score: 73%**
